Reviews

Definitely one of the better publication I have got possibly read. It really is writter in basic phrases and not difficult to understand. You wont sense monotony at anytime of your respective time (that's what catalogs are for about if you request me).

National Academies Press. Paperback. Book Condition: new. BRAND NEW, Advancing the Nation's Health Needs: NIH Research Training Programs, Committee for Monitoring the Nation's Changing Needs for Biomedical, Behavioral, and Clinical Personnel, Board on Higher Education and Workforce, Policy and Global Affairs, National Research Council, National Academy of Sciences, The National Institutes of Health's role in supporting research has long been recognized as a major factor in advancing the health needs in the nation and the world. The National Research Council was charged with the responsibility of periodically assessing the National Institutes of Health's National Research Service Awards program, thus this book is the twelfth edition in the series. While the National Research Service Awards program now supports only a fraction of the training in the biomedical, clinical, behavioral, and social sciences, it sets a high standard for the training in all doctoral programs in these fields. Also included are the training needs of oral health, nursing, and health services research. This book has been broadly constructed to take into account the rapidly evolving national and international health care needs. The past and present are analyzed and predictions with regard to future needs are presented.
