This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 Excerpt: .virus of the disease is destroyed before it has time to multiply, and consequently the individual is protected from the disease.

Please understand that I am not ready to give up the theory of the formation of specific proteases. I see no other explanation of the immunity conferred by vaccination or by one attack of the disease. However, in presenting this matter I wish to proceed without being influenced by preconceived ideas, and I wish to repeat that the idea of a nonspecific protein digestion in anaphylactic shock especially has much in its favor, both in fact and in theory. The poison developed in anaphylactic shock may not come from the protein of the reinjection and the protease developed in sensitization may not be specific. Anaphylactic shock may be due wholly to the unmasking of a nonspecific ferment and the poison formed may come from the...
